The story as to'd by Mr. Ellitt is rather a romanticone, and his honesty is unquestioned.

Before onesalf of the botte had been used I was well. I recommended it to my trien ts and their experience was the same. We all unite in saying it is the best." For sale by Druggists.

#### How a Harshaw Man Profits by Unexpected Events.

A representative of the Star writes as follows from Harshaw which shows the characteristics of Sombo.

"There are two restaurants and barber shop in Harshaw whose pro prietors do not seem to known that the war is over and that there has been a general depreciation in prices. The barbershop is run by a shoemaker who is also a jewsler, a musician and a mender of musical instruments. Each of his manifold occupations may be said to be incidental until be tecomes an expert. One of the restaurants is conducted by a syndicate of three Chinamen, the other by a colored gentlemen who is his own business manager and chief He is an adept in both departments Both restaurants have a curious scale of prices. A Star representative stopped at the colored person's restaurant for dinner for which he paid the modest price of thirty-five cents. After the transaction had been closed the proprietor inquired of the egent it he expected to remain in camp. The question appeared to be without any particular motive and was unfortun-

silver dollar two meal checks which would reduce the price of three meals for a dollar.

The agent declined the checks and attempted to reason with the colored erother upon the iniquity of his system. Fifty cents might not be too much for a meal but it was too great a margin on three meals. "Now," said he, "suppose I'd take your checks; I might die befere the next meal or I might suddenly decide to leave camp before I could use them. Then where would I get off?"

"Date just bit boss," replied the astute colored person ; "date jist where my pu'cotage comes in ; I figures on some folks havin' something happen to em foh dey gits de tickets used up.
